

UNITED NATIONS SUSTAINABLE DEVELOPMENT GOAL #6

Safe water is delivered to
88%
of the world's people

billion

people **do not** have access to safe drinking water

of the world uses safely managed and improved sanitation

4.2
billion people

lack safely managed sanitation, including **2 billion** who lack basic sanitation services

673 million

people practice open defecation

40%
of the world's population still lack a basic handwashing facility with soap and water at home

3/4 of the population of Least Developed Countries lack handwashing facilities with soap and water

2 out of 5

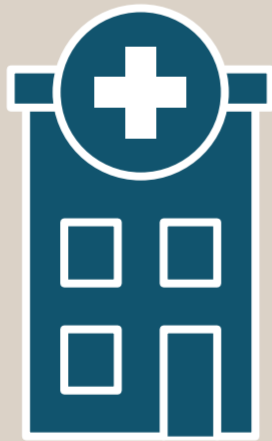

people in Sub-Saharan Africa have no handwashing facility at all

In the least developed countries

22%

of health care facilities have no water service

21%

have no sanitation service

22%

have no waste management service

To meet this goal by 2030...

Capital spending for WASH would need to reach **\$114 billion annually** to achieve universal access to water, sanitation, and hygiene.
